

ALB KITCHEN WATER DUO

TABLE OF CONTENTS.

- 01** What is Alb Kitchen Water Duo?
- 02** Models of Alb Kitchen Duo.
- 03** Alb Active kitchen water cartridge.
- 04** Alb Active Plus kitchen water cartridge.

01.

ALB KITCHEN WATER DUO.

Alb Filter Duo turns your tap fitting into a drinking water dispenser. The kitchen water filter is screwed directly to the tap and is installed within a few minutes. It fits most taps in kitchens.

Simply pull the lever and enjoy pure drinking water. Suitable for most taps, our Alb Filter Duo is installed within minutes.

- . Possibility to choose between filtered and unfiltered water
- . Compatible with all standard taps
- . Filter cartridges with a maximum service life of 6 months
- . Design, manufacturing and production in Southern Germany
- . Modular filter housing. Various cartridges are available for selection

02.

MODELS WE OFFER.

We offer two models of the Alb Kitchen Filters:

- 1) Alb Active kitchen water cartridge
- 2) Alb Active Plus kitchen water cartridge

03.

ALB ACTIVE.

For a refreshing drink. Use our Active Filter Cartridge not only to enhance the taste of your drinking water, but at the same time reduce pollutants that our tap water often carries.

Inside the cartridge there is a specially cleaned activated carbon core, which is able to filter chlorine, organic pollutants, various medicinal residues,

light hydrocarbons, solvents, pesticides, aromas and fine particles (rust, lime flakes, sand). In addition, bland and chlorinated taste impairments are effectively neutralized in the water.

AGAINST GERMS AND BACTERIA:

Safety for you and your family: germs and bacteria cannot get into your water due to the germ barrier and the sintered micro-structure of our Active Plus+.

AGAINST BAD TASTE AND SMELLS:

High-quality Alb coconut block activated carbon absorbs annoying odors (chlorine, CHC's, CFC's, etc.) and impairs taste in drinking water.

FILTRATION OF MICRO-PLASTICS:

Due to the ultra-fine structure of the sintered activated carbon, microscopically small plastic particles are reliably retained.

FILTRATION OF HEAVY METALS:

The absorbing effect of activated carbon binds heavy metals such as lead and copper in drinking water.

REDUCTION OF PESTICIDES AND DRUG RESIDUES:

Organic compounds such as pesticide residues, herbicides, insecticides, drug residues, hormones and hormone-like substances can be reduced.

CARTRIDGE CHANGE ONLY 2X A YEAR:

Quick, easy change - Duration: 2 min. Recommendation according to DIN 1988 every 6 months.

STRUCTURE:

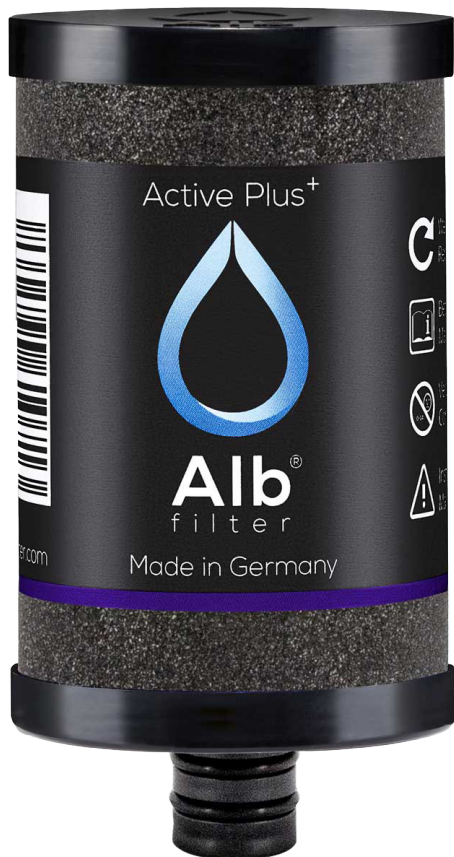

DRINKING WATER ACCORDING TO EUROPEAN STANDARD.

QUALITY MADE IN GERMANY:

Sustainable and high-quality production coupled with Swabian inventiveness - Made in Germany.

04.

ALB ACTIVE PLUS.

Refreshing drinking pleasure with the PLUS of safety. Our Active Plus version consists of a sintered coconut-based activated carbon block and is capable of filtering a large number of bacteria and germs out of the water in advance. In addition, the Active Plus+ version has the same features as our standard Active filter cartridge. So that

you and your family can safely enjoy your home water directly from the tap.

Note: Flow rate at 4.5 bar - 1.2 l/min
Due to the very high fineness, the flow rate is greatly reduced. We therefore recommend using the Active Plus+ cartridge only in conjunction with the Alb Filter Duo tap filter.

AGAINST GERMS AND BACTERIA:

Safety for you and your family: germs and bacteria cannot get into your water due to the germ barrier and the sintered micro-structure of our Active Plus+.

AGAINST BAD TASTE AND SMELLS:

High-quality Alb coconut block activated carbon absorbs annoying odors (chlorine, CHC's, CFC's, etc.) and impairs taste in drinking water.

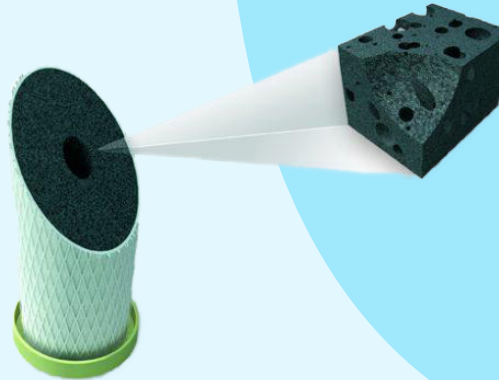

FILTRATION OF MICRO-PLASICS:

Due to the ultra-fine structure of the sintered activated carbon, microscopically small plastic particles are reliably retained.

FILTRATION OF HEAVY METALS:

The absorbing effect of activated carbon binds heavy metals such as lead and copper in drinking water.

CARTRIDGE CHANGE ONLY 2X A YEAR:

Quick, easy change - Duration: 2 min. Recommendation according to DIN 1988 every 6 months.

STRUCTURE:

ENJOY DRINKING WATER CARE-FREE.

QUALITY MADE IN GERMANY:

Sustainable and high-quality production coupled with Swabian inventiveness - Made in Germany.

REDUCTION OF PESTICIDES AND DRUG RESIDUES:

Organic compounds such as pesticide residues, herbicides, insecticides, drug residues, hormones and hormone-like substances can be reduced.
